Professional Summary

Frontend-focused Full Stack Developer skilled in React, TypeScript, Vue.js, Node.js, and modern web development. Experience building SaaS applications, real-time systems, authentication workflows, and AI-powered tools with scalable frontend and backend integration.

Professional Experience

Freelance Software Developer

October 2023 – Present

- Developed **5+ client web applications**, including **BagYo**, using React, Vue.js, TypeScript, and Tailwind CSS.
- Built authentication systems, dashboards, and API integrations while **improving development efficiency by 30%** through reusable components.
- Enhanced **frontend performance and responsiveness by 25%** through optimized state management and UI workflows, and contributed to the **open-source AI agent platform Aden Hive** through frontend enhancements and bug fixes.

LINCHPIN ORGANIZATION – Frontend Developer

December 2023 – April 2025

- Led frontend development of the organization's website, **improved user experience and responsiveness by 35%**.
- Created 20+ reusable UI components**, reducing future development effort by 40%.
- Collaborated with cross-functional teams to deliver production-ready features within project deadlines.

MADADGAAR FOUNDATION - Web development Intern

July 2023 – September 2023

- Developed responsive web pages that **improved mobile compatibility by 30%**.
- Converted design mock-ups into functional interfaces with 95% design accuracy.
- Assisted in **debugging and optimization efforts**, reducing frontend issues by 20%.

Education

Bachelor of Computer Applications (BCA) in Gaming and Graphics

September 2022 – July 2025

Presidency University, Bengaluru, India

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, Vue.js, HTML5, CSS3, Tailwind CSS, Zustand, Responsive Design

Backend: Node.js, Express.js, FastAPI, Python, C#, Java

Databases: MongoDB, PostgreSQL, MySQL

Tools & DevOps: Git, GitHub, Docker, AWS S3, Postman, Socket.io, GitHub Actions, CI/CD

AI & LLMs: OpenAI API, Google GenAI, Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Agent Workflows, LLM Application Development, Function Calling

Projects

Aether — 3D Digital Workspace

- Built a full-stack SaaS platform supporting secure **authentication and workspace management** for multiple concurrent users.
- Designed scalable APIs and optimized state management, **reducing application load times by 25%**.

AutoLife AI — Smart Daily Automation System

- Developed an AI-powered productivity assistant that automated scheduling and task management workflows, **reducing manual effort by 40%**.
- Implemented multi-agent AI workflows and intelligent task routing, improving **automation accuracy by 30%**.

Real-Time Chat Application

- Built a real-time messaging platform supporting instant communication with **latency improvements of 35% using Socket.io**.
- Integrated cloud file sharing and secure authentication, enhancing user experience and data accessibility.
