Professional Summary

Frontend-focused Full Stack Developer skilled in React, TypeScript, Vue.js, Node.js, and modern web development. Experience building SaaS applications, real-time systems, authentication workflows, and AI-powered tools with scalable frontend and backend integration.

Professional Experience

Freelance Software Developer

October 2023 – Present

- Built responsive web apps with Vue.js, React, TypeScript, and Tailwind CSS, including the BagYo startup platform.
- Developed SaaS products with authentication, dashboards, and API integrations.
- Improved UI performance, state management, and frontend workflows across multiple applications.

LINCHPIN ORGANIZATION – Frontend Developer

December 2023 – April 2025

- Led frontend development for the organization's official website using Vue.js and TypeScript.
- Built reusable UI components and responsive layouts to improve maintainability.
- Collaborated with design and development teams to deliver production-ready web interfaces.

MADADGAAR FOUNDATION - Web development Intern

July 2023 – September 2023

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Converted UI designs into functional frontend implementations.
- Assisted in frontend debugging and performance improvements.

Education

Bachelor of Computer Applications (BCA) in Gaming and Graphics

September 2022 – July 2025

Presidency University, Bengaluru, India

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, Vue.js, HTML5, CSS3, Tailwind CSS, Zustand, Responsive Design

Backend: Node.js, Express.js, FastAPI, Python

Databases: MongoDB, PostgreSQL, MySQL

Tools & DevOps: Git, GitHub, Docker, AWS S3, Postman, Socket.io, GitHub Actions, CI/CD

AI & APIs: OpenAI API, Google GenAI, REST APIs, JWT Authentication

Projects

Aether – 3D Digital Workspace

- Built a SaaS productivity platform using React/Next.js, Node.js, MongoDB/PostgreSQL, JWT authentication, and Zustand state management.

AutoLife AI – Smart Daily Automation System

- Built an AI automation assistant using FastAPI, Python, OpenAI APIs.
- Implemented multi-agent task routing for scheduling and reminders.

Real-Time Chat Application

- Developed a real-time messaging application using React, Node.js, Express, Socket.io, and JWT authentication.
- Integrated cloud file sharing using AWS S3/Cloudinary.
